Modern parking requires seamless integration of different areas, personnel and vehicle management, data processing, billing and accounting, in order to provide high quality, efficient services to the customer. Not only the Macroware RFID technology can achieve all of this, it can greatly reduce the operational cost as well.

Owing to the unique requirement of parking management and the technology challenges of the complete system, Macroware has developed a tailor made solution for parking management:

- ❖ **Availability Indicator** – indicator signaling the drivers of available parking bays.
- ❖ **Vehicle Tags for long term tenants** – long term vehicle tags can be affixed on the vehicle for fastest access of the gate of the parking.
- ❖ **Billing System** – Fast and accurate fee calculation system for the POS.
- ❖ **Real Time and offline parking statistics**
- ❖ **Security** – RFID Real time location service and CCTV integration.
